AQ-RF-6UBT
WATERPROOF REMOTE CONTROL

Contents

Please check first that the package contains all of the items below. If something is missing, contact the store where you purchased the product.

• Remote Control RF Handset (AQ-RF-6UBT-T)
• RF Receiver (AQ-RF-6UBT-R)
• Charging Cable

Charging the Remote Control

The remote has a built-in Polymer Lithium rechargeable battery and comes with a charging cable. Connect one end of the charging cable to the charging connection on remote control and connect the USB end of the charging cable to any USB charger (5V DC) for charging.

Make sure the remote has been charged before used.

Synchronizing the Remote Control

The remote should already be paired from the factory, but if you need to synchronize the remote, follow the steps below.

1. Connect the receiver dongle to the female DIN connector of the Aquatic AV stereo before the stereo is powered ON.

2. Turn the power to the stereo ON and hold the remote control close to the stereo.

3. Press and hold MODE on remote control until the LCD shows "Pairing in Progress" and then release the button.

4. The remote's LCD should display "Paired" wIthin 2 seconds to verify pairing has been successful. If it fails to pair, the LCD will display "Retry again". If this happens, wait 5 seconds and repeat the above procedures.
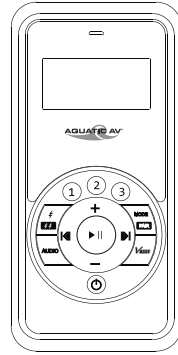

i *If the pairing process is not successful, try again to put your remote close to the remote receiver.*

i *Depending on the frequency of usage, the remote may drain its battery. Please charge the remote before use. If the LCD shows nothing, the battery has been drained and will need charging.*

Remote Control Operation

The AQ-RF-6UBT Remote Control is supported by all Aquatic AV '6-series' stereos however USB and FM radio will only be available if your stereo supports these functions.

For more information please refer to your stereo's user manual.
