

**"FOR ALL THE REASONS THAT YOU WANTED A POOL,
WITHOUT ANY OF THE PROBLEMS OF OWNING ONE."**

Swim a mile without making a turn. Innovative engineering brings the best of both fitness and relaxation together in the ultimate Royal Spa Swim Spa Elite.

Easily maintained the Royal Swim Spa takes up to 80% less maintenance. Variable swim resistance challenges any caliber of swimmer by utilizing multiple pumps and jet positions. You can custom dial the output from a sprint to a casual swim. Your family entertainment center accommodates temperature ranges from 70°F swim usage to over 100°F for "hot tub only" mode.

Strategically engineered, the six swim jets provide both bottom lift and direct force for optimal work-out dynamics. A dedicated pump system provides output flexibility from 0 to more than 1100 gallons per minutes of current to challenge any level of swimmer. Pump, motor, and electrical equipment are located at the opposite end from the steps for maximum swim current efficiency. Our spa's are uniquely fiberglass reinforced with a structural Warranty of 40 YEARS!

**"Unlike home pools, the Swim Spa won't take up your whole backyard.
In fact, the Royal Swim Spa is frequently
put in half of a 2-car garage."**
